

VARIANT CONFIGURATION (VC) FOR THE ASCENT CONTROL MODULE (ACM), LICENSES, DEVICE PACKS AND DRIVERS

Variant configuration is a new method for ordering Alerton products that allows you to pick and choose the appropriate size and add-ons for your job with a simple click of a button. You can fully configure your ACM to arrive on the job with the correct device capacity, drivers and option cards already installed: all you need to do is mount the ACM, connect the communication trunks, and apply power.

If you ever need additional device capacity or drivers, you can place your order 24 hours a day, 7 days a week, enabling you to receive these items within an hour under normal conditions; however, your experience may vary.

The following steps outline how to order an ACM quickly and efficiently, its base licenses, add-on device packs and drivers.

Note To have a functional ACM, you must have at least one base license installed.

ORDERING THE ACM, BASE LICENSES, ADD-ON DEVICE PACKS, DRIVERS AND OPTION CARDS

The ACM requires configuration. It ships from the factory in the same way as any other hardware, and per the parameters you enter in the Requested Delivery Date field at checkout.

ACM base licenses (ACMxxx, NC-XXXX-A), add-on device packs (AL-DP-xxx, DEVICE-XX) and drivers (ACM-DR- xxx, DR-xx) require configuration and are typically delivered to your Niagara Central account within an hour of submitting your order.

The three ACM communication option cards (ACM-OC-xxx) are not configurable materials, and no action is required on your part except to add a quantity to your cart. Option cards ship from the factory in the same way as any other hardware, and per the parameters you enter in the Requested Delivery Date field at checkout.

1. Ordering the ACM, its base licenses, add-on device packs and drivers is basically the same as any other Alerton product. You can type the part directly into the Shopping Cart, search and select from the Catalog, or upload from an Excel file. The difference is that you must configure the ACM at the point of order.

The four configurable materials are ACM, ACM-ALERTON, ACM-DRIVERS and ALER-8000-OPTIONS. For a detailed list of which licenses and drivers you need for each order, read the ACM Estimating and Configuration Guide on the ACM page of the Alerton Ascent pages, which you access exclusively through the ASN by clicking Products > Ascent. The ACM part ordering is shown here, the other options are for Ala Carte ordering, ordering separately for pre-deployed ACM where addition items are needed.

Note: Niagara Core licenses only available at the point of configuration of ACM, including Niagara core device capacity and device packs. Device pack upgrades and Drives are also available Ala Carte using ALER-8000-OPTIONS for deployed ACM's, note that the available options for ACM are in the pricelist on the global controller tab.

2. If you search for ACM products within Web Channel, you find ACM. Select ACM and add to cart and select the configuration button.

Item	Product	Quantity	Description	Availability	List Price	Total Price
10	ACM	1 EA	ASCENT CONTROL MODULE Other Lead Time: 3 Working Days <input type="checkbox"/> Configurable Special Configure	1 EA on 03/30/2021		

Quick Info
The configuration for the product ACM is incomplete. Go to [Product Configuration](#) to update/complete configuration

3. The Configuration page will display. To configure, you can use the pull-down menu—

General ?

**Note: This only depicts the selection process, part numbers and descriptions are only reference. For actual part numbers refer to estimating guide or pricelist.*

4. Select the desired ACM base license pack, add-on device pack and driver. This example has both Alerton and Niagara selections, for ACM with Niagara the configuration will determine the appropriate required SMA needed per your device capacity and device pack combinations selection (choose one of 3 options). The

Status line at the top of the Configuration page will display a green check mark when all required options are selected. Click Accept to return to your Shopping Cart.

Note: Only one of each base license or device pack is allowed when you initially order the ACM, e.g., ACMxxx, AL-DP-xxx, NC-xxxx-A or DEVICE-xx. However, if you require a base license or additional device packs after you have installed the ACM, you can order them using the ACM-ALERTON and ALER-8000-OPTIONS. Multiple add-on device packs can be applied to each base license. An ACM can have up to 384 total connected devices, which can be either on the Alerton side or the Niagara side.

6. If you attempt to check out before you finish configuring an ACM base license pack, add-on device pack or driver item, you will see a warning screen in your Shopping Cart. To rectify, simply click Configure for each software item and complete the configuration process, then click Continue.

IMPORTANT! Once purchased and processed, no ACM, ACM base license pack, add-on device pack, Niagara based License, Niagara Device pack or any drive may not be returned or replaced. If you order the incorrect version, you will need to use it on a different project as Alerton cannot reprocess the software to a different size or type. We apologize for any inconvenience this may cause.

7. Complete the mandatory fields on the Additional Data screen in your Shopping Cart.

8. In the past, Alerton sales and marketing teams used the Project Name for data reports. With Variant Configuration, this mandatory section now determines where your licenses are stored in Niagara Central. The Project Name you enter in this field will be used by Niagara Central to create a folder where your licenses will be stored.
